

Cryptocurrency Dashboard

July 19, 2021

Alex Palmer

Wesley Burns

Vershard Thomas

Kelly Gumm

Pitch

Concept

- Dashboard displaying popular cryptocurrencies' current prices, changes over 24 hrs and volumes + Crypto Subreddit
- Get news and updates from “hottest” posts of the previous day
- Save last- viewed Posts
- Provide user a way to make informed investing decisions
- as a USER interested in investing crypto currencies, I want to observe the relationship between social media and cryptocurrency sales to make informed investment decisions

Crypto Prices 2021	
<p>Bitcoin Price: \$1407.505858935376 24 Hour % Change: -0.87809619 Bitcoin Volume: 18394880213.078416</p> <p>Dogecoin Price: 1.0006818545474 24 Hour % Change: 0.01957947 Dogecoin Volume: 1619125727.2048545</p> <p>Litecoin Price: 119.39610974092463 24 Hour % Change: -1.43991132 Litecoin Volume: 1278767792.554443</p> <p>ShushSwap Price: 1.00038330265392 24 Hour % Change: 0.00039548 SushCon Volume: 79761763.64643987</p> <p>Ethereum Price: 1891.604722189385 24 Hour % Change: 0.16483198 Ethereum Volume: 13814971283.237663</p>	<p>Cryptocurrencies are taking the developing world by storm, with more users now in Nigeria than in the US</p> <p>A curated list of the best crypto research tools to help anyone navigate the cryptoverse</p> <p>"We are in a bear market" or "The next bull run is imminent" is being announced on this sub on a daily basis.</p> <p>I finally got to 0.1 ETH</p> <p>Just tried to explain crypto to my friend's parents. They responded by telling me it's a pyramid scheme.</p> <p>BTC Approaches Consolidation Apex, Huge Move Imminent</p> <p>Bear market? Bull market? Nope. We're in a Schrödinger's cat market.</p> <p>We are in a bear market.</p> <p>Let's say we do make a million. What the hell do we do with it?!</p> <p>The US government announces generous crypto rewards for those who help identify cyber activities</p> <p>Till Vitalik speaks very fluent Chinese. This guy is talented as hell.</p> <p>DCA vs Buy the Dip - an analysis</p> <p>Binance FUD - needless and unnecessary, and the sentiment hurts the crypto community.</p> <p>Why isn't there an automatic check before sending crypto to see if the address you are sending it to is a valid address for that crypto?</p> <p>You wake up tomorrow and you've become a Crypto millionaire. What do you do with your</p>

Process

- jQuery, Bulma  CSS Framework, Coin Market Cap API, CORS Anywhere, Reddit API
- Wesley - API feeds/JavaScript, Alex - API feeds/JavaScript/Repo, Vershard/Kelly - Bulma CSS/Presentation
- Coding between different OS, Solving for local storage
- Finding Bulma Framework, pulling Reddit API for “hot” posts in crypto subreddit

Demo

Directions for Future Development

We would like to scrape the subreddit to see the number of times a specific crypto or crypto ticker is mentioned to determine if more or less mentions has any effect on price of cryptocurrencies.

Include visual indicator for price increases/decreases by color coding API outputs.
